

BUILD. FIX. PERFECT.

Struggling with thinning hair? Our advanced hair cover-up solutions are designed to instantly transform your look by concealing sparse areas and restoring confidence. Whether you're dealing with general thinning or a receding hairline, our 3 innovative products work together to create the appearance of thicker, fuller hair—quickly and effortlessly.

1. BUILD HAIR BUILDING FIBRES

Available in 7 natural shades, these lightweight, electrostatically charged fibres replicate human hair, attaching to the hair and scalp, instantly increasing density and reducing light reflection to provide the appearance of a fuller head of hair. The precision silicone applicator shown ensures even, controlled coverage time after time.

Directions: Make sure your hair is dry. Shake the bottle before use over thinning areas, applying the desired amount of fibres onto the hair and scalp. Gently pat your hair to disperse the fibres. Build more coverage as you see necessary. To fix your desired look, use the Aderans Hair Holding Spray to secure. For extra precision in application, we recommend using the application nozzle.

2. FIX HAIR HOLDING SPRAY

This lightweight mist secures the hair fibres in place for all-day, natural-looking results—wind, rain, and sweat-resistant. Take your style from noon until night.

Directions: Shake the bottle before use. Hold the bottle 10-12 inches from the hair and use sparingly until the desired styling is achieved.

To remove wash hair thoroughly with shampoo, massaging the scalp to ensure all fibres are released into the passing water.

3. PERFECT HAIRLINE POWDER

Designed for targeted application along the hairline, this powder helps blend and refine the look. It comes in 7 natural shades and includes a soft, washable sponge applicator for easy use.

Directions: Using the puff sponge applicator, dip and collect a light covering of powder and apply along the hairline in a stippling motion. The hairline powder allows you to create a natural hairline with a buildable coverage.

To remove product from skin use warm water, a mild face cleanser and cotton pad.
